DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group III in the reply filed on July 26, 2004 is acknowledged. The traversal is on the ground(s) that there is no serious burden to examine Groups II and III. This has been found persuasive. However, Applicant did not traverse the restriction between Group I and the other groups and therefore, with regard to this aspect of the restriction requirement, Applicant's election is deemed to be without traverse.

Claim Objections

2. Claims 67-89 are objected to because of the following informalities: The spelling of the term "fiber" is inconsistent within the claims ("fiber" vs. "fibre"). It is suggested that all claims recite the term "fiber". Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. Claims 67-68 and 86-88 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 67-68 are deemed indefinite as there is no step for correlating the results of the use of the intercalator with both the state of the muscle fiber and the activation state. In claim 68, it is unclear how this method step is practiced, i.e. the timing and object of the administration of the myotoxin.

Art Unit: 1651

Claims 86-88 lack antecedent basis in claims 78-80. It is believed that the dependency of these claims should be to claims 82-84.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claim 67 is rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent 6,444,642 to Sklar et al.

The claim recites that a DNA intercalator is contacted with muscle fibers. Sklar et al., at col. 4, teach that the rate of survival of muscle fibers may be measured by contacting the fibers with propidium iodide, which stains dead cells. Clearly, a live cell is intact and therefore inherently validates a test to determine a change in the activation state of the muscle precursor cells. Therefore, the reference anticipates the claim.

Allowable Subject Matter

6. Claims 69-84 and 89 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
